SAMARITANS · HACK4IMPACT BUILD-A-THON

Hey Sam
Connection Pulse

Are we ready for the next person who reaches out?

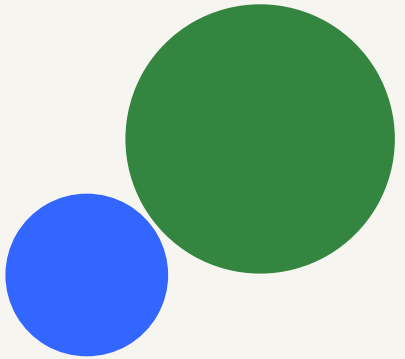

Yasmine Bridaa · David Ribeiro · Andres Lopez · Shuyi Li

THE REFRAME

Most dashboards ask whether marketing worked.

We asked: what happens when it does?

WHO IT SERVES

Every connection has two young people in it

REACHING OUT

Young people up to age 24

Texting 439-726, 9 AM to midnight

LISTENING

Peer volunteers aged 15–24

A consistent 4-hour shift, every week

A healthy system cares for both sides.

CONNECTION PULSE

One system, not four reports

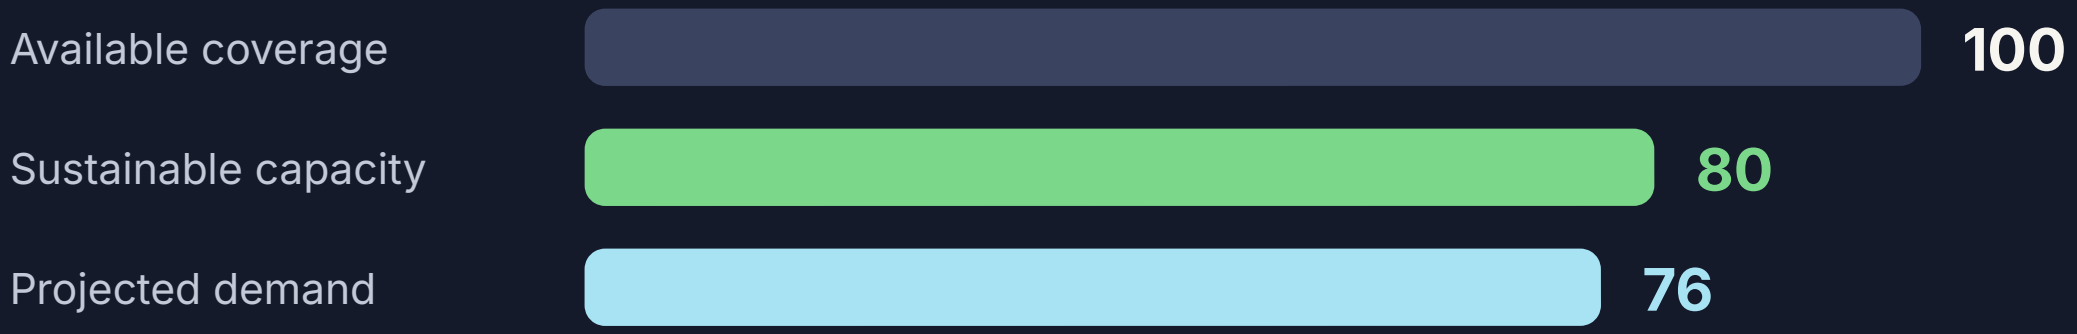

DATA IN

HUMAN CAPACITY BUFFER

Covered isn't the same as sustainable

Watch · protect peer capacity

Only 4 conversations from the healthy boundary.

Demo data · conversations per day · not real Samaritans performance

PLANNING SIMULATOR

What would unlock the next 1,000 connections?

Scenario	Demand	Sustainable	Status
Marketing +20%	90	80	Concern · outpaces peers
+ Peer capacity +10%	90	88	Watch · 2 short
+ 8 peer shifts at peak	90	98	Ready to connect

Grow the peer network first. Then turn up the volume.

Demo data · levers: marketing, peer capacity, operating hours

EARLY WARNINGS

Three signals most dashboards miss

News surges

Separates news-driven demand from campaign lift. Responds with staff, never ads.

Awareness-to-connection lag

Shows when a campaign's demand will arrive, so shifts are ready first.

The peer flywheel

Tracks volunteer recruitment beside demand, so capacity grows with reach.

PRIVACY BY DESIGN

Totals only.
Groups under 10 hidden.
No message content. Ever.

De-identification happens in the pipeline, before anyone sees a chart.

FEASIBILITY

Start Monday, with tools you already have

First 30 days · $0

One number, weekly

A Salesforce report, a free Looker Studio dashboard, and a 30-minute review.

Months 2–3

Add the signals

News alerts, survey trends, volunteer check-ins, and a weekly summary.

As capacity grows

Plan ahead

The planning simulator, recruitment tracking, and language matching.

Owner: Hey Sam text operations · about 1–2 hours a week after setup

The goal isn't more clicks.

It's more young people connected, sustainably.
